GREEN FEEL GLOBAL
CONTRACTING COMPANY

About Our Company

Integrated Contracting & Industrial Support

Green Feel Global Contracting Company serves the construction and industrial sectors through a diverse range of contracting and project support services. Our principal activities include building construction, general and industrial civil works, technical manpower supply, specialized piping activities, HVAC installation, and safety materials supply.

We understand that every project requires effective coordination, suitable technical resources, and attention to operational requirements. Our approach is centered on identifying client needs, organizing relevant services, and supporting project activities through clear communication and practical planning.

By combining multiple service disciplines under one corporate identity, Green Feel Global aims to offer clients a convenient point of contact for their construction and industrial support requirements throughout the Kingdom of Saudi Arabia.

One Company. Multiple Industrial Solutions.

Our Vision, Mission & Core Values

GREEN FEEL GLOBAL
CONTRACTING COMPANY

VISION

To build a respected corporate presence in the contracting and industrial services sector through reliable support, professional relationships, and consistent attention to client requirements.

MISSION

To provide practical construction, technical manpower, piping, HVAC, and safety material solutions that respond to project needs while promoting quality awareness, effective communication, and responsible service delivery.

OUR CORE VALUES:

Professionalism
Conducting business with clarity, responsibility, and respect.

Quality Focus
Recognizing the importance of accurate work and service standards.

Safety Awareness
Encouraging responsible practices in industrial environments.

Reliability
Maintaining clear commitments and responsive coordination.

Integrity
Building business relationships through transparent communication.

Client Focus
Understanding project requirements and prioritizing practical solutions.

Our Complete Services

Green Feel Global offers five principal service divisions, bringing construction, industrial technical services, workforce support, and safety-related supply activities together within one coordinated business portfolio.

Building Construction & Civil Works

Building construction and general or industrial civil work services for commercial and industrial project environments.

Industrial Manpower Supply

Engineering, supervisory, mechanical, electrical, civil, skilled technical, and general workforce categories for project-based requirements.

Safety Materials Supply & Sales

Safety materials and workplace protective equipment for construction, industrial, and maintenance operations.

Underground & Industrial Piping

Underground piping activities and specialized RTR, GRP, FRP, and SDP pipe-related works.

HVAC Systems & Installation

HVAC systems, AHU installation, chiller panel installation, and ducting fabrication and installation services.

Building Construction Services

Construction Solutions for Functional Project Environments

Green Feel Global Contracting Company provides building construction services covering practical construction requirements, structural work activities, and related site operations. We focus on understanding project requirements and coordinating suitable construction support in line with the intended scope of work.

Our building construction services are intended to support organized site activities, effective workforce coordination, and attention to the quality and safety considerations associated with building projects.

- **Building Construction Activities**
- **Structural Work Support**
- **Site Preparation and Coordination**
- **Construction Workforce Support**
- **General Building Work Requirements**

GREEN FEEL GLOBAL
CONTRACTING COMPANY

General Civil Construction Works

Practical Civil Solutions for Diverse Site Requirements

General civil construction is an essential part of building and infrastructure development. Green Feel Global provides civil work services relevant to project preparation, structural activities, and general site-based construction requirements.

Our approach emphasizes understanding the work scope, maintaining effective site coordination, and supporting suitable resources for the required tasks. We recognize the importance of clear communication, safety awareness, and organized execution throughout civil construction activities.

01
Site Preparation & Civil Activities

02
Structural Civil Work

03
Concrete-Related Activities

04
General Site Work Support

05
Civil Workforce Coordination

Focused on the Work That Supports Every Structure.

GREEN FEEL GLOBAL
CONTRACTING COMPANY

Industrial Civil Works

Civil Construction Support for Industrial Facilities

Industrial construction environments require coordination between civil work activities, technical disciplines, and site operations. Green Feel Global provides industrial civil work services relevant to the construction and development of industrial facilities, operational structures, and associated civil requirements.

Our service focus includes organized workforce coordination, attention to technical work requirements, and practical support for activities performed in industrial construction environments.

01 **Industrial Facility Civil Works**

02 **Structural & Foundation-Related Activities**

03 **Site Construction Requirements**

04 **Coordination with Mechanical and Piping Activities**

05 **Industrial Civil Workforce Support**

Supporting Industrial Construction Requirements.

Construction Capabilities & Work Gallery

Our construction and civil works service portfolio addresses a range of building, structural, and industrial project requirements. The following visuals represent the work environments and activities associated with these service areas.

01 — Building Construction
Structural development and building-related site activities.

02 — Civil Work Operations
General civil construction and field coordination.

03 — Industrial Structures
Civil work environments associated with industrial facilities.

04 — Skilled Workforce
Technical and general workforce supporting construction operations.

GREEN FEEL GLOBAL
CONTRACTING COMPANY

Underground & Industrial Piping Works

Specialized Piping Services for Industrial Applications

Green Feel Global Contracting Company provides underground and industrial piping work services for project environments where pipe installation, material handling, and coordinated field activities are required.

Our service scope includes piping work involving RTR, GRP, FRP, and SDP pipe systems. We recognize the importance of appropriate installation practices, workforce coordination, and attention to the specific requirements of each piping application.

SERVICES AT A GLANCE:

01 — Underground Piping Works

02 — Industrial Pipe Installation Activities

03 — RTR Piping Work

04 — GRP & FRP Piping Work

05 — SDP Pipe Work

Technical Piping Services for Demanding Work Environments.

GREEN FEEL GLOBAL
CONTRACTING COMPANY

RTR, GRP & FRP Piping Works

Specialized piping applications require attention to material characteristics, installation methods, and project-specific technical requirements. Green Feel Global includes RTR, GRP, and FRP piping activities within its industrial piping service portfolio.

RTR Piping

Reinforced Thermosetting Resin piping is used in applications where the selected material properties are suitable for the system's engineering requirements. Our service scope includes RTR pipe-related installation and field activities.

GRP Piping

Glass Reinforced Plastic piping is associated with industrial and utility applications requiring material selection and installation appropriate to the specified service conditions. We provide support for GRP piping work requirements.

FRP Piping

Fiber Reinforced Plastic piping represents a broader category of composite piping materials used across various industrial applications. Our service portfolio includes FRP pipe-related work and technical field coordination.

Underground & SDP Pipe Works

Underground Piping Activities & Field Coordination

Underground pipe installation involves careful site preparation, coordination of field activities, and attention to pipe placement and installation requirements. Green Feel Global provides services associated with underground piping and SDP pipe work within its broader industrial piping portfolio.

We focus on supporting the relevant work scope through practical coordination, appropriate workforce arrangements, and clear consideration of the requirements of each installation environment.

01

Site Preparation

Coordination of the work area before pipe installation activities.

02

Pipe Handling

Attention to material handling and positioning requirements.

03

Installation Activities

Support for underground pipe placement and associated work.

04

Field Coordination

Communication and workforce support during site operations.

Practical Support for Underground Infrastructure.

GREEN FEEL GLOBAL
CONTRACTING COMPANY

HVAC Systems & Solutions

Heating, Ventilation & Air Conditioning Services

Green Feel Global Contracting Company provides HVAC-related services for commercial and industrial project requirements. Our service scope includes HVAC systems, Air Handling Unit installation, chiller panel installation, and duct fabrication and installation work.

HVAC activities require coordination between equipment, technical personnel, installation procedures, and building requirements. We approach these services with attention to technical work needs, organized coordination, and practical project support.

OUR HVAC SERVICE SCOPE:

- HVAC System Works
- AHU Installation
- Chiller Panel Installation
- Ducting Fabrication
- Ducting Installation

AHU & Chiller Panel Installation

Green Feel Global provides installation-related services for Air Handling Units and chiller panels as part of its HVAC and mechanical service portfolio.

01

Air Handling Unit Installation

Air Handling Units are important components of ventilation and air-conditioning systems. Our AHU-related services address installation activities, mechanical positioning, worksite coordination, and the practical requirements of project-based HVAC operations.

02

Chiller Panel Installation

Chiller panel installation requires attention to the specified equipment arrangement, technical requirements, and site coordination. Our service focus includes installation-related activities supported by appropriate technical work planning and workforce arrangements.

Mechanical Installation Support with a Practical Approach.

GREEN FEEL GLOBAL
CONTRACTING COMPANY

Ducting Fabrication & Installation

Precision-Oriented HVAC Ductwork Services

Green Feel Global includes ducting fabrication and installation within its HVAC service portfolio. Ductwork plays an important role in distributing conditioned air through commercial and industrial ventillation systems.

Ducting Fabrication

Our fabrication-related services address the preparation and assembly of ductwork components in accordance with the intended system requirements and project work scope.

Ducting Installation

Our installation-related services focus on positioning, assembly, and coordination of ductwork within the relevant building or industrial environment.

SERVICE HIGHLIGHTS

- HVAC Duct Fabrication
- Duct Assembly Activities
- Duct Installation
- Technical Workforce Support

From Fabrication Activities to On-Site Installation.

Industrial Manpower Supply

Workforce Solutions for Technical & Industrial Requirements

Green Feel Global Contracting Company provides industrial manpower supply services covering engineering, supervisory, technical, skilled, and general workforce categories. Our manpower portfolio is designed to respond to varied requirements across construction, mechanical, electrical, civil, and industrial work environments.

We recognize that workforce requirements vary according to project scope, work discipline, and operational needs. Our service focus is on understanding manpower categories, coordinating relevant workforce requirements, and maintaining responsive communication throughout the service process.

01 **Engineering & Management**

02 **Mechanical & Electrical**

03 **Civil & Construction**

04 **Technical & Skilled Trades**

05 **General & Support Services**

The Right Workforce Categories for Diverse Project Needs.

Mechanical & Electrical Workforce

Green Feel Global provides mechanical, electrical, and instrumentation-related manpower categories for industrial and construction project requirements. These disciplines support installation activities, equipment-related work, technical operations, and field coordination.

Mechanical Disciplines

- Mechanical Engineer
- Millwright Fitter
- Pipe Fitter
- Tube Fitter
- Pipe Fabricator
- Structural Fitter
- Mechanical Foreman
- Plumber

Electrical & Instrumentation

- Electrical Engineer
- Instrument Engineer
- Instrument Technician
- Instrument Fitter
- Industrial Electrician
- Building Electrician
- Auto Electrician
- A.C. Technician

Workforce Categories for Mechanical, Electrical & Instrumentation Requirements.

GREEN FEEL GLOBAL
CONTRACTING COMPANY

Civil & General Support Workforce

Green Feel Global supplies civil construction, skilled trade, and general support workforce categories to address a broad range of site and operational requirements. Our manpower service portfolio extends from civil supervision and structural activities to support functions required in construction and industrial environments.

CIVIL & CONSTRUCTION

- Civil Engineer
- Civil Foreman
- Scaffolding Foreman
- Steel Fixer
- Steel Erector
- Mason
- Tile Mason
- Carpenter
- Scaffolder
- Painter

GENERAL & SUPPORT SERVICES

- Safety Officer
- Storekeeper
- Office Secretary
- Document Controller
- Heavy Driver
- Light Driver
- Helper
- General Laborer
- Cleaner
- Tea Boy

Supporting Construction Teams and Daily Site Operations.

GREEN FEEL GLOBAL
CONTRACTING COMPANY

Industrial Manpower Categories

Green Feel Global provides a wide range of engineering, supervisory, technical, skilled trade, operational, and general support manpower categories for industrial and construction requirements.

No.	Manpower Category
01	Mechanical Engineer
02	Instrument Engineer
03	Electrical Engineer
04	Safety Engineer
05	Civil Engineer
06	Civil Foreman
07	Scaffolding Foreman
08	Electrical Foreman
09	Piping Foreman
10	Safety Officer
11	Document Controller
12	Office Secretary
13	Instrument Technician
14	Instrument Fitter
15	Tube Fitter
16	Pipe Fitter
17	Industrial Electrician
18	Building Electrician
19	TIG Welder (SS/CS)
20	6G Welder
21	3G Welder
22	Iron Worker
23	Gas Cutter
24	Grinder Operator
25	Structural Fitter

No.	Manpower Category
26	Pipe Fabricator
27	Scaffolder
28	Rigger Level III
29	Rigger Level 3
30	Plumber
31	Sandblaster
32	Steel Erector
33	Forklift Operator
34	Tile Mason
35	Mason
36	Carpenter
37	Steel Fixer
38	Spray Painter
39	Painter
40	Office Boy
41	Cable Puller
42	Helper
43	General Laborer
44	Heavy Driver
45	Light Driver
46	Bus with Driver
47	GRP Laminator
48	RTP Laminator
49	Tea Boy
50	Cook

GREEN FEEL GLOBAL
CONTRACTING COMPANY

Safety Materials Supply & Sales

Essential Safety Materials for Workplace Requirements

Green Feel Global Contracting Company includes safety materials supply and sales within its industrial service portfolio. Workplace protective equipment and safety-related products are important considerations in construction, industrial, maintenance, and site operations.

Our service focus is on supporting clients' requirements for safety-related materials and practical workplace equipment. Product selection should reflect the relevant work environment, intended use, and applicable project requirements.

PRODUCT CATEGORIES:

- Safety Helmets
- Protective Gloves
- High-Visibility Vests
- Safety Footwear
- Safety Goggles
- Hearing Protection
- Fall Protection Equipment
- Site Safety Accessories

Supporting Safer Work Environments.

04 Industrial Manpower Supply
Engineering, technical, and skilled workforce categories.

05 Safety Materials Supply
Protective equipment and workplace safety-related materials.

Five Service Divisions. One Corporate Identity.

Why Choose Green Feel Global?

Selecting a contracting and industrial service provider requires careful consideration of service scope, communication, project understanding, and practical support. Green Feel Global aims to bring these priorities together through a diversified service portfolio and a client-focused approach.

Our Service Advantages

01 Multi-Discipline Services
Construction, manpower, piping, HVAC, and safety materials within one service portfolio.

02 Project-Focused Approach
Attention to the nature, scope, and operational requirements of individual projects.

03 Professional Communication
Clear and responsive coordination with clients regarding service requirements.

04 Technical Service Coverage
Access to service categories covering engineering, technical trades, and industrial activities.

05 Safety Awareness
Recognition of the importance of responsible practices in industrial and construction environments.

06 Client-Oriented Support
A practical approach to understanding project needs and developing positive working relationships.

Our Commitment

Green Feel Global is committed to approaching each service requirement with professionalism, clear communication, and attention to practical project needs. We value responsible coordination, service quality, and positive long-term business relationships.

Your Requirements. Our Commitment.
